

Eric Taylor

Music Theory in Practice

GRADE 5

The Associated Board of the Royal Schools of Music

Syllabus for Grade 5

As in preceding grades, with the addition of:

- (1) Irregular time signatures of $\frac{5}{4}$ $\frac{7}{4}$ $\frac{5}{8}$ $\frac{7}{8}$, and the grouping of notes and rests within these times. Irregular division of simple time values.
- (2) Tenor clef (C clef centred on 4th line). The identification of notes in the four clefs in any of the keys set for this grade, and the transposition at the octave of a simple melody from any clef to another. The writing at concert pitch of a melody notated for an instrument in B_b, A or F, and vice versa (the interval of transposition up or down will be given). The writing in open score, using treble and bass clefs, of a passage for SATB written on two staves, and vice versa.
- (3) Scales and key signatures of all major and minor keys up to six sharps and flats. All simple and compound intervals from any note.
- (4) The identification of $\frac{5}{3}$ and $\frac{6}{3}$ chords on the tonic, supertonic, subdominant and dominant in any of the keys set for this grade. The identification of the $\frac{6}{4}$ chord and of the progression $\frac{6}{4}$ $\frac{5}{3}$ on the dominant note in any of the keys set for this grade. The choice of suitable chords using any recognised method of notation at cadential points of a simple melody in the major keys of C, G, D or F.
- (5) The composition of a simple melody of not more than eight bars, using a given opening and writing for a specific instrument (some choice will be given) or (at candidate's choice) the composition of a melody to given words. Appropriate performing directions relating to tempo, dynamics and articulation will be required.
- (6) More terms and signs. The recognition of ornaments, including the replacement of written-out ornamentation with the appropriate signs, but not vice versa. Questions about a passage of music written for voices or instruments will include questions on the types of voice and names of instruments, the clefs they use, instrument family groups and the basic way by which they produce sound, as well as points of general musical observation designed to test the candidate's ability to apply theoretical knowledge to actual music.

The music on the cover is the opening of an arrangement for trumpet in D and piano by Philip Cranmer of the aria, 'The trumpet shall sound', from Handel's *Messiah* (*Handel and Bach Arias*, published by the Associated Board)

In the quoted music examples, tempo marks without brackets occur in the original as shown. Tempo marks in brackets occur earlier in the music or are editorial.

A Irregular time signatures

(see *The AB Guide to Music Theory*, 1/2 and 5/3)

An 'irregular' bar is one which cannot be divided into equal groups of two or three beats. The most common are those containing five beats (quintuple time) and seven beats (septuple time). Examples of their time signatures are:

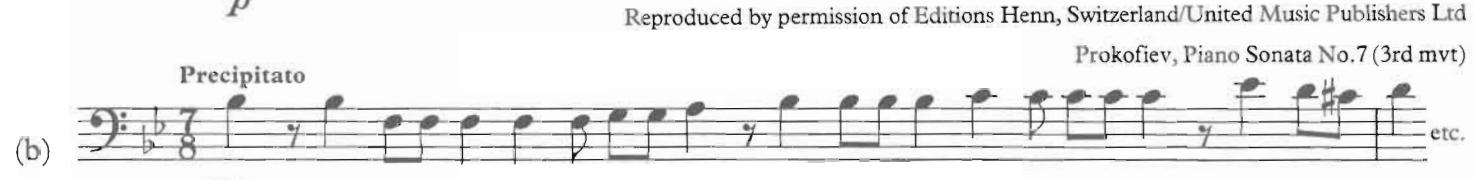

$\frac{5}{4}$ (five crotchets in a bar) $\frac{7}{4}$ (seven crotchets in a bar)

$\frac{5}{8}$ (five quavers in a bar) $\frac{7}{8}$ (seven quavers in a bar)

In Grade 5, the only irregular time signatures will be those listed above. Examples requiring the addition of bar-lines or time signatures raise no new problems: they are simply a matter of counting.

Exercise 1 Add bar-lines to the following examples, which all begin on the first beat of the bar.

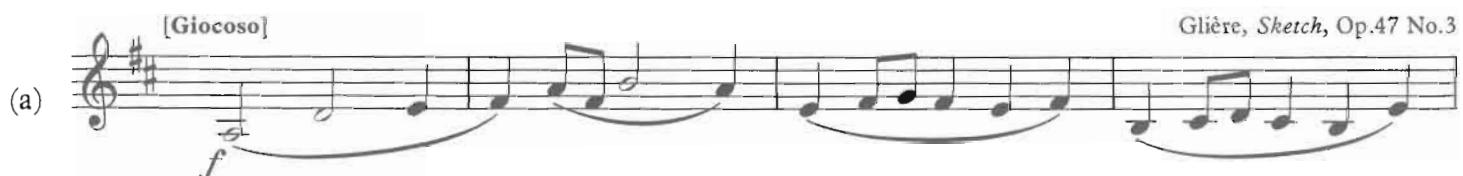

(a)  *d'Indy, Du Rythme, Op.68 No.10*

B Tenor clef

(see *The AB Guide to Music Theory*, 4/7)

Both the alto and tenor clefs are C clefs (): the only difference between them is their position on the stave. In the alto clef (which was introduced in Grade 4) middle C is on the third line:  but in the tenor clef middle C is on the fourth line: 

Key signatures of up to five sharps or flats are arranged thus:

The tenor clef may be used by cellos, bassoons and tenor trombones; it is no longer used in vocal music.

Exercise 4 Underneath each of these notes write its letter name.

Name

Exercise 5 After each clef, write the key signature and tonic chord of the given key.

E major

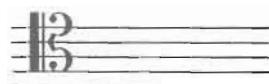

D♭ major

A♭ major

B♭ minor

G♯ minor

C♯ minor

F minor

B major

Exercise 6 Rewrite each of these passages at the same pitch, using either the treble or bass clef as indicated. Include any given performance directions.¹

(a)  Glinka, *Ruslan and Ludmila* (Overture)

¹This should always be done in similar exercises.

(b) **Prestissimo**
Verdi, String Quartet (3rd mvt)
cantabile

(c) **J. S. Bach, Cantata 'Wacher auf!'**

(d) **Adagio**
Elgar, Cello Concerto (3rd mvt)
pp cresc. f > > p > pp
etc.

These musical examples are arranged vertically. Example (b) shows a treble clef staff with a 13/8 time signature, featuring a 'cantabile' section. Example (c) shows a treble clef staff with a 13/8 time signature, labeled 'J. S. Bach, Cantata "Wacher auf!"'. Example (d) shows a bass clef staff with a 13/8 time signature, labeled 'Adagio' and 'Elgar, Cello Concerto (3rd mvt)'. All examples include dynamic markings like 'pp', 'f', 'p', and 'pp' with crescendo and decrescendo arrows.

Exercise 7 Rewrite these examples at the same pitch in the tenor clef.

(a) **(Allegro con brio)**
Rawsthorne, Street Corner (Overture)

f

Reproduced by permission of Oxford University Press.

This musical example shows a treble clef staff with a 2/4 time signature. The dynamic 'f' is present. The music consists of eighth-note patterns.

(b) **(Lento maestoso $\text{♩} = 54$)**
Copland, Billy the Kidd (Intro: "The open prairie")

ff marcato

etc.

©Boosey & Hawkes Music Publishers Ltd

This musical example shows a treble clef staff with a 2/4 time signature. The dynamic 'ff marcato' is present. The music consists of eighth-note patterns.

C Major and minor keys up to six sharps and flats

(see *The AB Guide to Music Theory*, 4/1-3)

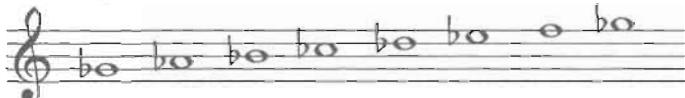

Keys with up to five sharps or flats were included in Grade 4. The keys with six sharps are F \sharp major and D \sharp minor; and the keys with six flats are G \flat major and E \flat minor.

Notice that F \sharp major and G \flat major are enharmonic equivalents: their scales *sound* the same although they are *written* differently:

F \sharp major

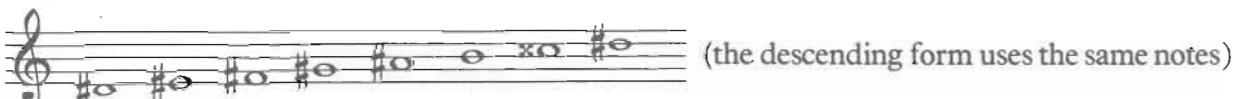

G \flat major

Similarly, D \sharp minor and E \flat minor are enharmonic equivalents:

D \sharp harmonic minor

E \flat harmonic minor

D \sharp melodic minor

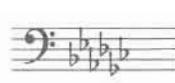

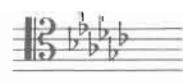

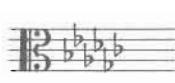

E \flat melodic minor

Composers sometimes write pieces (or, more commonly, passages *within* pieces) in more complicated keys: e.g. seven sharps (C \sharp major/A \sharp minor) or seven flats (C \flat major/A \flat minor). But these extreme keys are generally avoided, because there are simpler enharmonic equivalents. C \sharp major, for example, is more easily written as D \flat major (five flats instead of seven sharps). D \sharp minor, too, is rare: composers generally prefer to write in E \flat minor.

Key signatures with six sharps or flats are arranged thus:

Exercise 8 Add accidentals where needed to make the given scales. (Do not use key signatures.)

G \flat
major

D \sharp
harmonic
minor

F \sharp
major

E \flat
melodic
minor

E \flat
harmonic
minor

D \sharp
melodic
minor

Exercise 9 Add the clefs and accidentals needed to make the given scales. (Do not use key signatures.)

F \sharp
major

E \flat
melodic
minor

G \flat
major

D \sharp
harmonic
minor

D \sharp
melodic
minor

E \flat
harmonic
minor

Exercise 10 After each clef write the key signature, followed by the tonic triad, in the given keys.

F♯ major

D♯ minor

G♭ major

E♭ minor

Exercise 11 Name the key of each of the following. Then rewrite them, using the correct key signatures. Remove any accidentals which become unnecessary, but remember also to add any that may be needed.

(a) (Poco lento e grazioso) Dvořák, *Humoreske*, Op.101 No.7

Key

(b) J.S. Bach, 48 Preludes & Fugues, Bk. II (Fugue No.8)

Key

Exercise 11
(continued)

Tchaikovsky, Overture '1812'

(c) *Allegro giusto*

p *cre* — — — *scen* — — — *do* — — — etc.

Key

(d) *Moderato*

mf

Rachmaninov, *Élégie*, Op.3 No.1

Key

(e) *Andante molto calmo*

Puccini, *Madam Butterfly* ('One fine day')

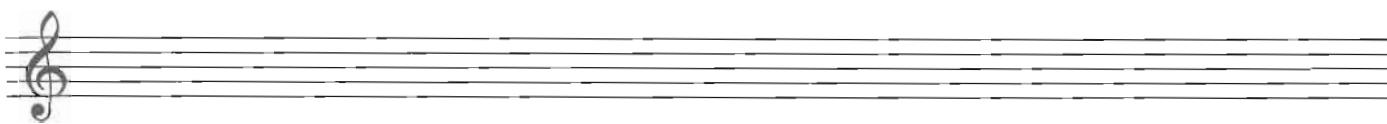

Key

Exercise 12 (i) Rewrite the following enharmonically, using key signatures of six sharps, but without changing the sound.

(a)

(Marziale) 

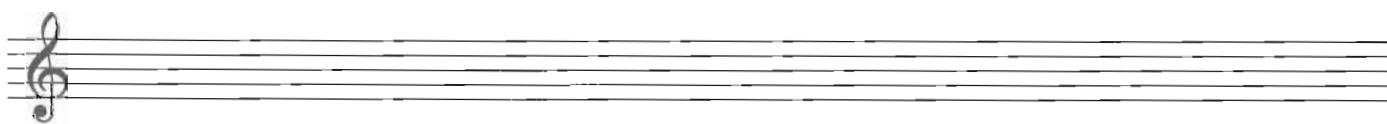

Sousa, *The High School Cadets March* etc.

(b)

Sehr breit 

Mahler, Symphony No.2 (5th mvt) etc.

(ii) Rewrite the following enharmonically, using key signatures of six flats, but without changing the sound. (Notice the change of clef in the second example.)

(a)

Allegro ma non troppo 

Beethoven, Piano Sonata, Op.78 (1st mvt) etc.

(b)

Einfach 

Schumann, *Romance, Op.28 No.2*

D Transposition

(see *The AB Guide to Music Theory*, 7/2)

You will be asked to transpose a melody. Any of the following intervals may be required:

- (1) up or down an octave;
- (2) up or down a major 2nd;
- (3) up or down a minor 3rd;
- (4) up or down a perfect 5th.

These are the intervals most frequently used by transposing instruments in the orchestra¹. In this Section we will deal with each of them in turn.

(1) *Transposition up or down an octave*. This was introduced in Grade 3, where only the treble and bass clefs were used. In Grade 5, the alto and tenor clefs are also required. Provided you have become familiar with these clefs there should be no difficulty – but make sure that you do actually *transpose* the passage (rather than merely rewrite it at the same pitch in the different clef), and also that you transpose it *one* octave and not two.

Exercise 13 Write this passage an octave lower in each of the given clefs.

Poco adagio; cantabile

Haydn, String Quartet, Op.76 No.3 (2nd mvt)

etc.

¹See *The AB Guide to Music Theory*, Part II, 19 & 20 (especially 20/2)

Exercise 14 Write this passage an octave higher in each of the given clefs.

Allegro

Handel, *Messiah* ('He trusted in God')

etc.

Exercise 15 Write this passage an octave higher in the treble clef, and an octave lower in the bass clef.

Vif

Dukas, *The Sorcerer's Apprentice*

etc.

Reproduced by permission of Editions Durand S.A., Paris.

Exercise 16 Write this passage an octave higher in the treble clef, and an octave lower in the bass clef.

J.S. Bach, B minor Mass (Kyrie)

Largo

(2) *Transposition up or down a major second.* When instruments 'in B flat' (e.g. clarinets in B♭, trumpets in B♭) play middle C, the B♭ below it is heard. In other words, instruments in B♭ produce sounds a major 2nd lower than the written notes. For example, a melody notated thus -

would actually sound -

And to produce these sounds -

they would have to be written a major 2nd higher for an instrument in B♭ -

The pitch at which the music is actually heard is called 'concert pitch'.

As can be seen in the above examples, not only are the notes transposed but also the key signatures.

Care is also needed over accidentals occurring during the course of a melody. Note that:

- (i) An accidental may have to be changed in the transposed version: e.g. the F natural in the first example opposite becomes *E flat* in the transposed version.
- (ii) A chromatically altered note must be replaced by its exact equivalent and not by an enharmonic substitute. (It is true that, for various special reasons, composers do occasionally use enharmonic substitutes, but these are exceptions.) The F natural in the first example opposite (flattened 7th in G major) becomes E flat in the transposed version (flattened 7th in F major) – not D sharp.

Until the early 20th century, horn and trumpet parts were written without a key signature, whatever the key: accidentals were added before individual notes as necessary. Later composers have sometimes used key signatures. In the following exercises, and in examination papers, you should assume that a key signature is to be used unless there is an instruction to the contrary (as in Exercise 23 below).

Except where a transposed part is written without a key signature (as in Exercise 23), *every* accidental in the original requires a corresponding accidental in the transposed version. Do not ‘improve’ on the given music by omitting to include an accidental where one in the original was not strictly necessary. (It may have been put there as a sensible precaution, e.g. something being played by another instrument might cause confusion.)

The following exercises provide practice in these transpositions. Remember to make the necessary changes to key signatures. As a model, the solution to the opening of the first example in each exercise in this Section is given.

Exercise 17 These passages are notated for instruments in B \flat . Write them out at concert pitch, i.e. a major 2nd lower.

(a) Clarinet in B \flat

Allegro

Schubert, Octet (1st mvt)

etc.

(b) Trumpet in B \flat

(b)

Clarinet in B \flat

(Presto $J = 152$)Elgar, 2nd *Wand of Youth* Suite ('The Wild Bears')

(c)

Trumpet in B \flat

(3) *Transposition up or down a minor 3rd.* The concert pitch of instruments 'in A' is a minor 3rd lower than written: e.g. when a clarinet in A or a trumpet in A plays middle C, the A below is heard. Thus music written in C major would sound in A major. Similarly, music whose concert pitch is C major would have to be written in E♭ major.

Exercise 19 These passages are notated for instruments in A. Write them out at their concert pitch, i.e. a minor 3rd lower.

(a) *Coronet in A*

Molto maestoso

Elgar, *Pomp and Circumstance* March No.1

(b) *Clarinet in A*

Ravel, *Le Tombeau de Couperin* (Forlane)

Clarinet in A

Reproduced by permission of Editions Durand S.A., Paris.

(4) *Transposition up or down a perfect 5th.* Instruments 'in F' produce the note F ('concert F') when C is played. The most common examples are the horn (i.e. French horn) in F, and the cor anglais. Both sound the F below the C: their notes sound a perfect 5th lower than the written notes, and their parts are written a perfect 5th above the concert notes.

Exercise 21 These passages are notated for instruments in F. Write them out at their concert pitch, i.e. a perfect 5th lower.

Exercise 23 Transpose the following passages up a perfect 5th, so that they will sound at concert pitch when played by horns in F. Do not use key signatures. Add accidentals before all notes which need them: unnecessary accidentals should not be included.

Andante ma non troppo

Rachmaninov, Piano Concerto No.1 (3rd mvt)

(a) etc.

A musical score for Horn in F. The key signature is F major (one sharp). The time signature is 3/4. The dynamic is marked as *mf*. The tempo is *Andante ma non troppo*. The score consists of a single melodic line on a staff, starting with a grace note followed by a sixteenth-note figure. The line then continues with a series of eighth and sixteenth notes, ending with a long sustained note.

Horn
in F

(c)

Horn
in F

A musical score for 'The Star-Spangled Banner' in G major (two sharps) and common time. The melody begins with a treble clef, a key signature of two sharps, and a common time signature. The first measure consists of a eighth note followed by a sixteenth-note triplet (two eighth notes) and a quarter note. The second measure has a quarter note followed by a half note. The third measure has a half note followed by a quarter note. The fourth measure has a quarter note followed by a sixteenth-note triplet (two eighth notes) and a quarter note. The dynamic 'f' (fortissimo) is indicated at the beginning of the piece.

E Voices in score

(see *The AB Guide to Music Theory*, Part II, 14/2)

The most usual combination of mixed voices is soprano, alto, tenor and bass (SATB for short). Their music is written either on two staves or on four. In a two-stave layout, the upper voices (soprano and alto) are written on the top stave in the treble clef, with the two lower parts (tenor and bass) on the bottom stave in the bass clef. In a four-stave layout, each part has its own stave. When different vocal parts (e.g. soprano and alto) share a stave, the music is said to be written in 'short score'; and when each of them has a stave of its own, the music is in 'open score'. The staves are usually given separate bar-lines, both in open and in short scores:

The image shows two musical staves. The left staff, labeled 'Short score', has four lines for Soprano (S), Alto (A), Tenor (T), and Bass (B). The right staff, labeled 'Open score', has four separate staves for Soprano (S), Alto (A), Tenor (T), and Bass (B). Both staves are in 4/4 time and show the same musical passage. The tenor part in the short score is written in the bass clef, while in the open score, it is written in the treble clef with an 8th note head, indicating it sounds an octave lower than written.

You may be required to transcribe into open score a passage written in short score, or vice versa. The above examples illustrate three important points:

- (1) In short score the tenor part is written in the bass clef (at its true pitch); but in open score it is written in the treble clef, an *octave higher* than it actually sounds. (You should adopt the modern practice of writing a small 8 under the tenor's treble clef to show that the music sounds an octave lower than written.)
- (2) In short score the stems of soprano and tenor notes always go up, wherever they may lie on the stave; similarly, the stems of alto and bass notes always go down.
- (3) When two vocal lines share the same stave, an accidental before a note in one part must be written again if the same note occurs in the other part later in the same bar. Thus the second ♯ (to the G) in the two-stave example is necessary although, if this had been piano music, it would not have been.

Exercise 24 Transcribe the following passages into short score. (As a model, the solution to the opening of the first example is given.)

(a)

Purcell, Anthem 'Rejoice in the Lord alway'

3/4

Soprano (S): Treble clef, 4 notes.

Alto (A): Treble clef, 6 notes.

Tenor (T): Treble clef, 6 notes. Includes an 8th note below the staff.

Bass (B): Bass clef, 6 notes.

(b)

J.S. Bach, Chorale 'Wer weiss, wie nahe mir' (Cantata 166)

Common time

Soprano (S): Treble clef, 6 notes.

Alto (A): Treble clef, 6 notes.

Tenor (T): Treble clef, 6 notes. Includes an 8th note below the staff.

Bass (B): Bass clef, 6 notes.

Soprano (S) and Alto (A): Treble clef, 6 notes.

Exercise 25 Transcribe the following passages into open score. (As a model, the solution to the opening of the first example is given.)

(a) (Allegretto con spirito) Sullivan, *Mikado* (Madrigal)

Soprano (S) and Alto (A) staves in C minor. The solution consists of five empty staves for Soprano, Alto, Tenor (T), Bass (B), and Bassoon (B) respectively.

(b) (Allegro assai) Beethoven, Symphony No. 9 (4th mvt)

Soprano (S) and Alto (A) staves in C major. The solution consists of four empty staves for Soprano, Alto, Tenor (T), and Bass (B) respectively.

F More irregular time divisions

(see *The AB Guide to Music Theory*, 5/5a)

The most common irregular time divisions have already been considered: triplets (in Grade 2) and duplets (in Grade 4). The next two exercises provide practice in the use of some more elaborate groups. Notice that, in all of them, the irregular group replaces a 'simple time' unit (i.e. one which would normally divide into 2, 4, 8 etc.). A group of 5, 6 or 7 uses the same time values as a group of 4; and a group of 9 uses the same values as a group of 8.

Exercise 26 Complete the following sentences by adding  or  or  at the end of each.

 is performed in the time of a

 is performed in the time of a

5 is performed in the time of a

is performed in the time of a

is performed in the time of a ...

 9 is performed in the time of a

Exercise 27 Add bar-lines to the following examples, which all begin on the first beat of the bar.

(a) (Allegro deciso) *f dim.* riten. 5 *f subito a tempo* Heller, Prelude, Op.119 No.30

(b) (Allegro) *f appass. sost.* Vaughn Williams, Symphony No.4 (1st mvt)

(e) <img alt="Musical score for Haydn, Variations (for piano), Hob.XVII/6, variation (e). The score is in 2/4 time, key signature is B-flat major (two flats). Dynamics: p, f, 7. Articulations: 7. Measure 1: 2 eighth notes. Measure 2:

Intervals of more than one octave are 'compound' intervals, described in two ways, e.g.

major 9th	major 10th	perfect 11th	perfect 12th	major 13th	major 14th	perfect 15th
or	or	or	or	or	or	or
compound	compound	compound	compound	compound	compound	compound
major 2nd	major 3rd	perfect 4th	perfect 5th	major 6th	major 7th	perfect 8ve

For various reasons, some of these descriptions are used more frequently than others. Musicians generally refer to a '9th', '10th', '12th' and '15th' rather than to a 'compound 2nd' or a 'compound 3rd' etc. However, in the examination both types of description are acceptable.

Exercise 28 Above each of these notes write the note needed to produce the given interval.

augmented 6th	compound perfect 5th	diminished 8ve	minor 10th	major 9th
augmented 5th	compound minor 7th	compound minor 6th	augmented 2nd	compound diminished 3rd

Exercise 29 Describe fully each of these intervals, e.g. augmented 4th, minor 10th (or compound minor 3rd) etc. Remember always to note the key signature, in case it affects either of the notes forming the interval.

.....
.....
.....

Exercise 30 Describe fully each of the intervals marked 1, 2, etc. in the following passages. (Keep in mind the key signature and any accidentals which may have occurred earlier in the bar. Remember, too, that an interval in a melody is still calculated from the lower note, even if the higher note happens to come first.)

H Naming chords

(see *The AB Guide to Music Theory*, 8/2)

The chords to be identified in Grade 4 were the tonic (I), subdominant (IV) and dominant (V): all in root position. Grade 5 adds the supertonic (II). You will also be asked which note is in the bass (root, 3rd or 5th) or, to put it another way, which inversion the chord is in. There are various ways of showing this. The most economical is to add 'a', 'b' or 'c' (meaning root position, first inversion and second inversion respectively) to the roman figure denoting the chord. Thus –

Ia = tonic chord in root position;
 Ib = tonic chord in first inversion;
 Ic = tonic chord in second inversion.

Alternatively, you may write $\frac{5}{3}$ instead of 'a', $\frac{6}{4}$ instead of 'b', and $\frac{6}{5}$ instead of 'c' after the roman figure. The figures here refer to intervals from the bass note: IV $\frac{5}{3}$, for example, = the first inversion of the subdominant chord.

It is very common to indicate a root-position chord by the roman figure alone – e.g. just II (without either 'a' or ' $\frac{5}{3}$ '). If you add nothing to the roman figure, therefore, it will be assumed that you mean a root-position chord.

Here is an example of what is required in Exercise 32 below:

Key: B_b major IIb V I

Any equivalent of the above chord symbols is acceptable, provided it is clear what is meant and fully describes the function of the chord in the key.

Exercise 32 Name the keys of the following passages. Identify the chords marked with *, and indicate which of the notes is in the bass (or which position the chord is in).

I Composing a melody

In Grade 5 you will be asked to compose a short melody, lasting not more than eight bars. There will be a choice between composing for an instrument or for voice. If you choose the former, you will have the option of selecting one from a number of specified instruments (e.g. violin, cello, clarinet, trumpet). They will all be capable of playing melodies of the type to be discussed below, and you will not need a detailed knowledge of any of them. Nevertheless, you should keep in mind the basic characteristics of the instrument you choose. If you write for the violin, for example, you may wish to include some pizzicato notes, assuming that they are appropriate to the style of the melody. It is particularly important to keep in mind the lowest note which the instrument can play. (See *The AB Guide to Music Theory* Part II, Chapters 19–20 for this information.)

A melody for an instrument will have a given opening. One for voice will have given words but not a given opening. Bear in mind that voices usually have much smaller ranges than instruments: it would be sensible to keep within a range of a 12th.

Irrespective of whether it is written for an instrument or for voice, some general advice can be given about the type of melody required:

- (1) Notice that the syllabus says 'not more than eight bars' (these include the given opening in an instrumental melody). In the early stages at least, there is much to be said for aiming at exactly eight bars, since eight-bar melodies are very common and the easiest to compose. Many well-known songs, old and new, provide examples, but others are to be found in purely instrumental music.
- (2) Your melody should be self-contained: it should not be left at a point where something more is required to finish it.
- (3) Performance directions should be included (although a simple eight-bar melody is unlikely to need many). The following points are a guide:
 - (i) Start by deciding how fast you want the melody to be performed, and add a tempo direction (e.g. *Allegro*, *Andante* or a metronome mark).
 - (ii) Show the dynamic level (*mf*, *p* etc.) which you think suitable. If, during the course of the melody, you want to vary the speed or the dynamic level, give the necessary instructions (e.g. *rit.*, ~~—~~ etc.).
 - (iii) Add phrasing (articulation) marks, e.g. legato slurs and staccato dots. Care is needed in drawing slurs. It must always be clear which note they start from, and at which note they end: vague sweeps will not do. If (as in these melodies) there is only one voice or instrument on the stave, a slur is normally placed on the same side as the note-heads when these all go in the same direction. Where there is a mixture of upward and downward stems, the slur usually goes above the notes. Ties and staccato marks go within or below the slur – never above it.

Perhaps the most important point to stress in these preliminary remarks is the necessity of trying to hear in your mind what you have written. In the examination room, of course, you will not have access to an instrument. However, you may find it helpful to use one when practising, particularly in the early stages; and it is always a good idea to try over a melody when you have finished it, to see whether you have actually written the sounds you intended.

This test is more than a matter of working out patterns of notes on paper: it is a challenge to your inventiveness and imagination. The hints given below can do no more than provide a stimulus and a help in giving shape to your ideas.

The most important features in a melody are (i) its rhythmic organisation and (ii) the shapes produced by the pitches of its notes. Both may be illustrated by reference to some well-known melodies –

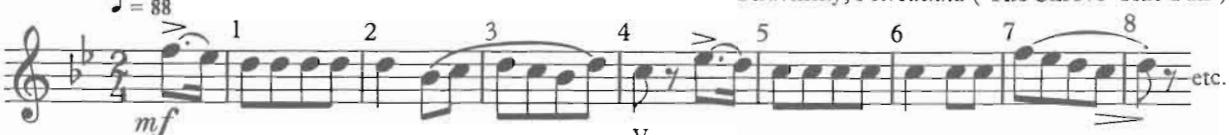

(a) 

Este's Psalter, 1592

While shep-herds watched their flocks by night, All seat-ed on the ground, The

an - gel of the Lord came down, And glo - ry shone a - round.

(b) 

Stravinsky, *Petrouchka* ("The Shrove-Tide Fair")

etc.

(c) 

Traditional, 'Barb'ra Allen'

In Scar-let town, where I was born, There was a fair maid dwellin', — Made

ev' - ry youth cry — 'well - a - way!' Her name was Barb' - ra Al - len.

(d) 

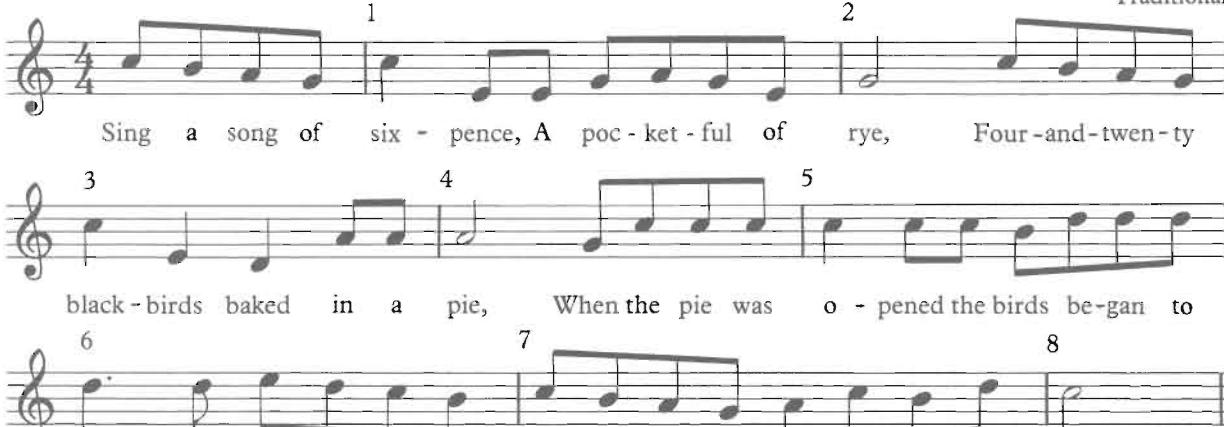

J. Clarke, *The Prince of Denmark's March*

(e) 

Haydn, Trumpet Concerto (2nd mvt)

(f) 

Handel, *Scipione* (March)

(g) 

Traditional

Sing a song of six - pence, A poc - ket - ful of rye, Four-and-twen - ty
 black - birds baked in a pie, When the pie was o - pened the birds be - gan to
 sing: O wasn't that a dain - ty dish to set be - fore a king!

(h) 

Mozart, Piano Concerto, K.595 (3rd mvt)

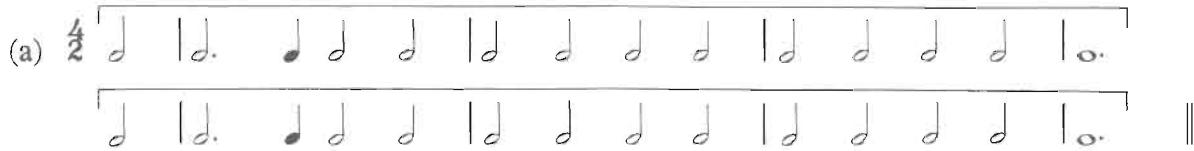

(i) 

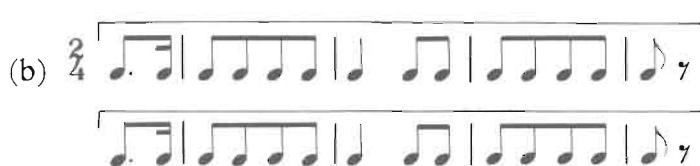

Purcell

Nymphs and shep - herds come a - way, come a - way; Nymphs and shep - herds
 come a - way, come a - way, come, come, come, come a - way. etc.

In planning the rhythm of the melody, you may find it useful to revise what was said about four-bar rhythms in Grade 2 (Section H) and Grade 3 (Section I) of *Music Theory in Practice*. The principles outlined there apply equally to the rhythms of eight-bar melodies (allowing for the fact that, in any references to the numbers of bars, the numbers now have to be doubled). In the melodies quoted on the previous pages, for example, you can see instances where:

(1) the rhythm of bars 1-4 is repeated exactly in bars 5-8 -

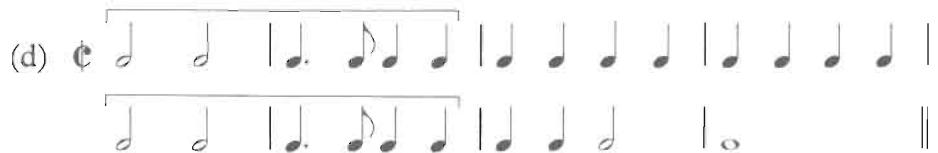

(a) 

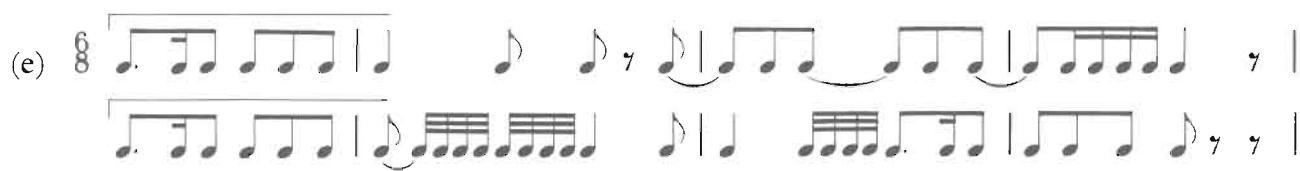

(b) 

(2) the two halves are very nearly but not exactly the same -

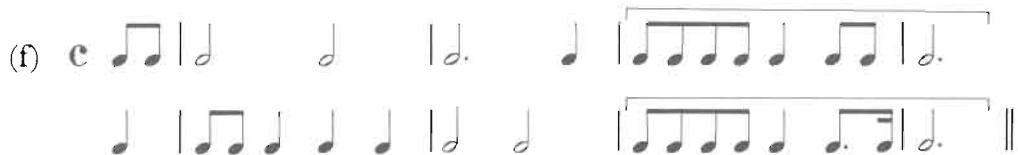

(c) 

(3) the two halves start the same but finish differently -

(d) 

(e) 

(4) the two halves start differently but finish the same, or very nearly so -

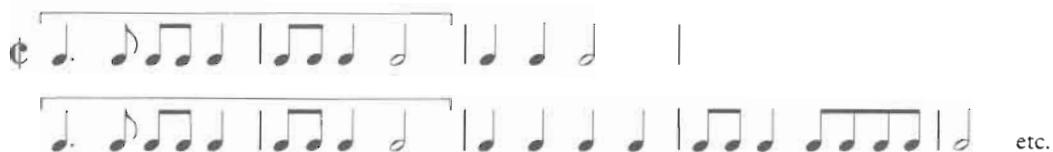

(f) 

(5) the opening rhythm is used again in the second quarter of the tune -

(g) 

(h) 

(6) the melody does not divide into *equal* sections: 'Nymphs and shepherds' consists of 3 + 5 bars, with the opening rhythm occurring again in bar 4 -

(i) 

When an opening rhythm occurs again later in a melody, its notes too may occur again, i.e. the repetition of the music is exact, as in Examples (d) and (i). There is always a danger, however, that an absolutely exact repetition will sound boring. To avoid this, the pattern of the notes may be modified, e.g. in Example (b) where the notes are all moved down one degree -

Notice also that each half of this tune contains another rhythmic repetition -

Here, the notes in the second half (bars 6-8) do not follow those in the first half (bars 2-4); however, the three descending quavers at the start of bar 3 are matched by three descending quavers at the start of bar 7 -

Exact or modified repetitions of the opening music occur most frequently at the start of the second half of the melody, as in Example (d). They are also common at the beginning of the second quarter, as in Example (g) -

Repetitions of whatever kind help to make a melody hold together, but they are not essential. What is always important, though, is the *overall* shape produced by the notes. In this connection, two points may usefully be made. The first is that a melody should have a sense of direction. 'While shepherds watched', for example, gradually moves upwards until it reaches the D, and then gradually comes down again. Very approximately one can say that the first half of the melody is an ascent, and the second half a descent: upward movement is balanced by downward movement. But neither half goes *straight* up or straight down. Both halves contain smaller ascents and descents. This is but one possible shape, however: there is no necessity to reach a high point half-way through a melody, and the particular ways in which ascending and descending movement may be balanced and contrasted are infinitely varied. The only thing which is always poor is an aimless circling around the same few notes.

The second point concerns cadences, and the chords which they imply. Apart from some folksongs and other special cases, most melodies are inseparably connected with their

supporting harmonies, and nowhere more so than at the cadence points. Thus, the final note of a melody will belong to the tonic chord (the chord with which most compositions almost always end), and will usually be the tonic note itself. The chord most commonly found at a cadence during the course of a melody (generally half-way through) will be the dominant. Notice that, in most of the melodies (a) to (i) above, the note at the half-way point belongs to the dominant chord – though it is not necessarily the dominant note itself. (These points have been shown by a 'V' printed below the melody.)

A melody set to words needs to be shaped in the same way as a purely instrumental melody. Nevertheless, there are both advantages and disadvantages in choosing to compose a melody to words. The big advantage is that the words themselves may suggest musical ideas – mood, rhythmic patterns, pitch shape, and so on. The disadvantage is that the melody must fit the words, and it will be partly judged by its suitability as a setting of them. This is a matter which goes beyond the problems of setting words to suitable rhythms, which were discussed in Section G of *Music Theory in Practice*, Grade 4. For example, the character of the melody must be suitable to the mood of the words: a bright and cheerful melody would clearly be unsuitable for sad words. Similarly, the shape of the melody should help to highlight the important words.

As illustrations, two settings are given below of a verse by Allan Cunningham. Its rhythmic aspect was discussed in *Music Theory in Practice*, Grade 4 (Section I). 'Version 4' given there is used in both the following settings: i.e. their rhythms are identical. The first setting adds emphasis to certain words (cold, snow, sleep, prim[roses]), by placing them at the tops of curves in the melody, with 'sleep' as the highest note of all. The second setting is poor because there is no such match: the shape of the melody does nothing to bring out the meaning of the words; and its high point (the top G) is particularly inappropriate on a weak syllable.

Andante
p

Gone were but the winter cold, And gone were but the snow, I could

sleep in the wild woods Where prim - ro - ses blow.

Andante
p

Gone were but the winter cold, And gone were but the snow, I could

cresc.
f

sleep in the wild woods Where prim - ro - ses blow.

Both of these settings are entirely 'syllabic': i.e. each syllable has only one note. However, syllables may of course be set to two or more notes –

$\text{♩} = 92$

p

Gone were but the winter cold, — And gone were but the snow, — I could
sleep in the wild woods Where primroses blow.

This can help to bring out the meaning of the words – but be warned: it can also do precisely the opposite! Here, as always, it is important to try and hear what you write. There is nothing worse than pointless complications.

When you work the next two exercises, remember that only the clef and the key signature should be shown at the beginning of the second and later staves – *not* the time signature. The only exception is when there is a change of time signature at the start of a new stave – and then the time signature should also be shown after the bar-line at the end of the previous stave.

Exercise 33 Compose melodies of not more than eight bars, using the following openings and writing for one of the given instruments in each case. You may substitute a different clef for the one given, provided it is appropriate to the selected instrument. Performance directions (tempo, phrasing, dynamics etc.) should be included.

(a) for violin, oboe or trumpet

(b) for violin, flute or oboe

Exercise 33

© From 'Grande Sicilienne' published by Duckworth & Co.

J Ornaments

(see *The AB Guide to Music Theory*, 12/1-2)

The new requirement in Grade 5 is to replace written-out ornaments by ornament signs.

For example,  would become .

Do not be confused by the fact that there may be other possible interpretations of the appropriate ornament apart from the one given: e.g. the above turn might also be played . Remember to add any necessary accidentals.

Exercise 35 Rewrite the following passages using ornament signs to replace the notes in brackets.

(a)  Liszt, *Romance Oubliée* etc. (b)  Haydn, *Keyboard Sonata, Hob.XVI/14*

(c)  Schubert, *Scherzo, D.593/1* etc. (d)  Bach, *Clavier Concerto, BWV 1056*

(e)  Mozart, *Violin Sonata, K.496* etc.

(f)  Widor, *Organ Symphony No.5*

K Chords at cadential points

(see *The AB Guide to Music Theory*, 9/2)

You will be asked to choose chords for a simple melody in C, G, D or F major. Only the chords on the tonic, supertonic, subdominant and dominant (I, II, IV and V) will be needed. They will be used at points in the melody where there is a cadence.

The chords most commonly used at cadences are:

V followed by I (making a 'perfect' cadence);
 IV followed by I (a 'plagal' cadence);
 any chord followed by V (an 'imperfect' cadence).

In Grade 5, therefore, an imperfect cadence may be I-V, II-V or IV-V.

You may also have to choose a chord to go before the two cadence chords.

There are various ways in which you can indicate a chord in this question. You can:

- (1) use roman numerals ('I', 'V' etc.) or
- (2) show how it might appear in jazz and other popular music (e.g. 'Dm'), or
- (3) add a figured bass, or
- (4) write out the notes in full on the staves.

Any way will be acceptable, provided it is clear what you mean.

Using the chords listed above, most degrees of the major scale can be harmonised in two ways, but for two notes (the 3rd and the 7th degrees) there are no alternatives. These are the possibilities in C major:

In selecting your chords, it will help you to notice these points:

- (1) It is not always suitable to give every melody note one chord. A long melody note may have two chords -

or one chord may be fitted to two or more melody notes -

Generally, chords change less often than melody notes.

(2) Sometimes there are notes in a melody which do not belong to the chords underneath. For example, two melody notes which belong to the chords may be linked by a note which does not fit the harmony. The notes marked * here are examples -

Such notes are called 'passing' notes. There must not be a gap between a passing note and the harmony note on either side of it.

(3) A similar situation occurs when a harmony note in the melody is played twice, with the next note above or below it played in between. Again, the notes marked * are examples -

Notes of this kind are called 'auxiliary' notes.

Exercise 36 Choose suitable chords for the places marked 1 _____ 2 _____ etc. in the following melodies. You may indicate the chords in any of the ways described above.

Traditional, 'Here we go round the mulberry bush'

(a)

.....

Exercise 36

(continued)

(b) **Allegro**

(c) **Allegretto**

(d) Traditional, 'Baa baa black sheep'

(e) **Con moto**

Traditional, 'Where are you going to, my pretty maid?'

(g) **Lento**

(h) **Allegro moderato**

L Performance directions

In Grade 5 you will be expected to know the meaning of the following Italian terms.

<i>attacca</i>	go straight on to the next section of music
<i>dolente</i>	sad, mournful
<i>dolore</i>	grief (<i>doloroso</i> : sorrowful)
<i>doppio movimento</i>	twice as fast
<i>estinto</i>	as soft as possible, lifeless
<i>incalzando</i>	getting quicker
<i>lacrimoso</i>	sad
<i>loco</i>	at the normal pitch (used to cancel an <i>8va</i> direction)
<i>lunga</i>	long (<i>lunga pausa</i> : long pause)
<i>lusingando</i>	coaxing, in a sweet and persuasive style
<i>misura</i>	measure (<i>alla misura</i> : in strict time; <i>senza misura</i> : in free time)
<i>ossia</i>	or, alternatively
<i>piacevole</i>	pleasant
<i>piangevole</i>	plaintive, in the style of a lament
<i>pochettino, poch.</i>	rather little
<i>rinforzando, rf, rfz</i>	reinforcing
<i>segue</i>	go straight on
<i>smorzando, smorz.</i>	dying away in tone and speed
<i>teneramente, tenerezza</i>	tenderly, tenderness
<i>tosto</i>	swift, rapid (but often used in the same sense as <i>troppo</i>)
<i>volante</i>	flying, fast

You will also be expected to know the meaning of the following German terms.

<i>aber</i>	but
<i>Ausdruck</i>	expression
<i>bewegt</i>	with movement, agitated
<i>breit</i>	broad, expansive
<i>ein</i>	a, one
<i>einfach</i>	simple
<i>etwas</i>	somewhat, rather
<i>fröhlich</i>	cheerful, joyful
<i>immer</i>	always
<i>langsam</i>	slow
<i>lebhaft</i>	lively
<i>mässig</i>	at a moderate speed
<i>mit</i>	with
<i>nicht</i>	not
<i>ohne</i>	without
<i>ruhig</i>	peaceful
<i>schnell</i>	fast
<i>sehr</i>	very
<i>süss</i>	sweet
<i>traurig</i>	sad
<i>und</i>	and
<i>voll</i>	full
<i>wenig</i>	little
<i>wieder</i>	again
<i>zart</i>	tender, delicate
<i>zu</i>	to, too

You should also understand the signs used to show reiterations and repeats
(see *The AB Guide to Music*, 13)

M Instruments and voices

In Grade 5 you will be expected to know the names of instruments, the clefs they use, instrument family groups and the basic way by which they produce sound. Section L in *Music Theory in Practice*, Grade 4, provides some basic facts; and Chapters 19–21 in *The AB Guide to Music Theory*, Part II, gives further information, although more than you will need to know at this stage.

The questions about a passage of music may include questions on voices and the clefs they use. See Section E of this book for some basic facts and Chapter 14 in *The AB Guide to Music Theory*, Part II, for more detailed information.

N General exercises

Exercise 37 The following passage is the opening of a piece, *Berceuse*, by the Russian composer, Ilynsky. Look at it, and then answer the questions below.

Poco andante

(a) Underline one of the following, to show which you think the music is meant to be played by: organ; harp; piano; string trio; harpsichord. Explain your reasons.

.....
.....

(b) What key is the passage in?

(c) Which degrees of the scale are *not* used in the melody (treble clef)?

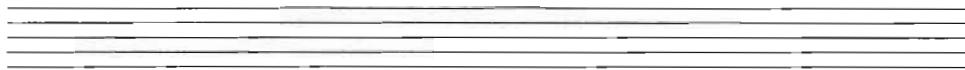

(d) Underline any of the following intervals which can be found between adjacent notes in the melody: minor 2nd; major 2nd; minor 3rd; major 3rd; perfect 4th; perfect 5th.

(e) Name the chord at the beginning of bar 3.

(f) What does *simile* in bar 2 imply?

(g) Suggest a suitable metronome mark for this piece.

(h) Write out bars 3 and 4 of the melody (treble clef), using a key signature of six sharps, but without changing the effect.

Exercise 38 The following passage is the opening of the second movement of Beethoven's Trio for 2 oboes and cor anglais. Look at it, and then answer the questions below.

Adagio cantabile

Oboe 1
Oboe 2
Cor
anglais

(a) Assuming that the key is F major, give a full description of the first chord in bar 4.

(b) What is the interval between the two oboes on the first beat of each of these bars?
Bar 2 Bar 3
Bar 4 Bar 5
Bar 6

(c) What musical effect is implied by *sf* (bar 6)?

(d) What is this sign  (bar 7) called?

(e) What do you notice about the passage for Oboe I marked ?
.....

(f) Name the bass instrument which is closely related to the oboe and cor anglais.
.....

(g) What do these two woodwind instruments have in common?

(h) As printed above, the cor anglais part (lower stave) is at concert pitch.
Transpose bars 1-4 of its music up a perfect 5th, to show the notation required by the player.

Exercise 39 The following passage is for 4-part choir. It comes at the end of a motet, *Ave verum*, by Mozart (the words are not shown.) Look at it, and then answer the questions below.

(a) Explain the meaning of SATB.

(b) The key of the motet is D major. Draw a ring round any notes in the passage which are chromatic in this key. (Note that some of the accidentals are not strictly necessary.)

(c) What is the interval between the highest note and the lowest note in the melody (top line of the music)?

(d) What is the largest interval between the two upper voices?

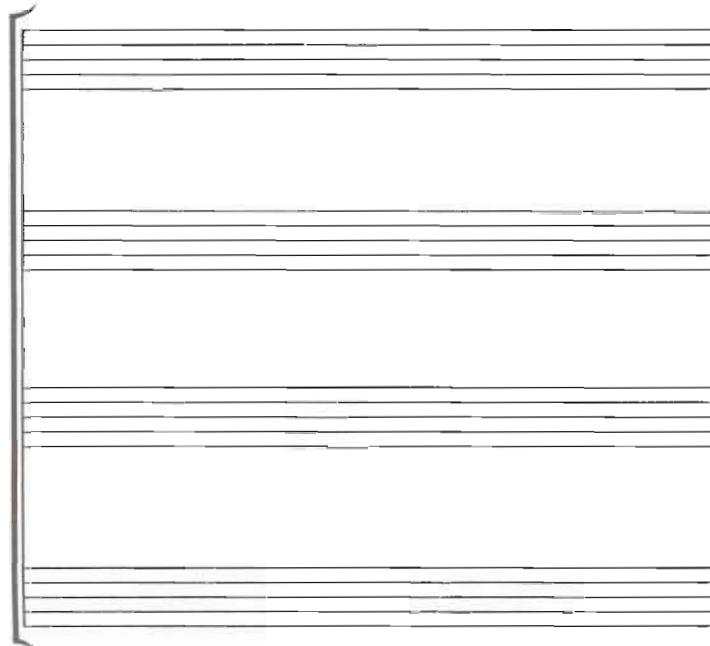

(e) What is the smallest interval between the two lower voices?

(f) Name the chords above the bass notes marked (i), (ii) and (iii).
 (i) (ii) (iii)

(g) Which note is sung in unison by two of the voices?

(h) Name two orchestral instruments which could play the bass part of this passage.
 and

(i) Write out bars 5-6 in open score, using the appropriate clefs. Remember to put in the key signatures.

Exercise 40 The following passage is from the last movement of Ravel's String Quartet, printed here on two staves (i.e. in short score). Look at it, and then answer the questions below.

(Vif et agité)

Reproduced by permission of Editions Durand S.A., Paris.

(a) What kind of time is the music in (double etc.)?

(b) What are the four instruments which form a string quartet?

.....

(c) Explain: (i) *vif*
 (ii) *sf*
 (iii) *pizz.*

(d) Explain what is meant by this notation - 

.....

(e) In the lower part of the bass clef of bar 3, name the intervals between:
 (i) quavers 1 & 2
 (ii) quavers 2 & 3
 (iii) quavers 3 & 4

(f) Why do you think brackets have been put around three accidentals in the upper part of the treble stave?

.....

(g) Rewrite the upper part of the bass clef of bars 3 and 4 in the alto clef.
